

# We're hiring a Wordpress Developer

We are looking for an experienced PHP/WordPress Developer with demonstrable skills in both front and backend technologies.

Working in our in-house creative and web team, you will be responsible for the technical implementation and maintenance of our web products. You will be required to deliver structured, modular, clean code to specified coding standards, and implement third-party libraries and plugins where appropriate.

The right candidate will be passionate about technology, innovation, opensource technologies, and will be enthusiastic about learning new technologies and sharing knowledge at our regular skill-sharing sessions.

## About the role

You will be required to liaise directly and effectively with various teams, building websites from scratch primarily using WordPress but some experience of other platforms such as Shopify would be an advantage. You will have the ability to code and build bespoke sites.

## Key responsibilities

- Designing and implementing new features and functionality
- Establishing and guiding the website's architecture
- Ensuring high-performance and availability, and managing all technical aspects of the CMS
- Helping formulate an effective, responsive design and turning it into a working theme a.
- Working with the web team to develop a strong search strategy for the respective product(s)
- To work alongside other developers and designers, discuss work and requirements
- Take part in code reviews and ensure a high standard of code quality, while fulfilling the tasks to a high standard and tight deadlines

Renshaw Barns, Upper Woodford,  
Salisbury, SP46FA

## Your key skills, qualifications, and experience

- Proven experience writing PHP to a high standard
- Experience in using MySQL
- HTML5, CSS3, Ajax
- Experience writing vanilla JavaScript
- WordPress theme and plugin development
- Solid knowledge of Git
- An understanding of RestAPI architecture

Plus any of the following would be an advantage:

- JavaScript frameworks (React, Vue, etc)
- Developing or integrating web services and APIs
- Supabase

## Salary + Benefits

- A competitive salary based on experience
- Bonus structure based on company results
- 25 days per annum plus bank holidays
- A day off for your birthday off in addition to the above -
- Personalised career development plan + CPD support
- Regular agency social engagements
- Pension contributions

## To apply
